CAREER OBJECTIVES

Final-year student from Indonesia currently studying in Malaysia, looking for an internship opportunity to gain hands-on experience and further develop professional skills. Available for a 3-month internship starting from January to April 2027, with a strong willingness to learn, adapt quickly and contribute effectively to a professional environment. Eager to apply academic knowledge in practice while building valuable industry experience.

SKILLS

Skills: Python, Java, SQL, Scala, JavaScript, CSS, HTML, Figma, Canva, Microsoft 365, Microsoft Access, Visual Paradigm, SAS Miner, Raspberry Pi
Language: Indonesian (Native), English (Fluent), Malay (Intermediate), German (Beginner)

EDUCATION

Bachelor of Science (Hons) in Computer Science — **April 2024 – Present**
Sunway University, Selangor — *Expected Graduation Date: April 2027*
Current CGPA: 3.85/4.00

Bachelor of Science (Hons) in Computer Science — **September 2023 – March 2024**
University of Hertfordshire, Hatfield

High School Diploma – Mathematics, Physics, Biology — **July 2019 – May 2022**
Jubilee High School, Jakarta
Average Grade: 87.2/100

PROJECTS

Dragon Fruit Stem Disease Classification (Final Year Project)

- Designed a feature-based transfer learning framework to classify six dragon fruit stem diseases, including Stem Canker and Anthracnose, using a public dataset of 724 high-resolution images.
- Built 16 classification pipelines by pairing features from frozen pre-trained backbones (ResNet50, DenseNet121, EfficientNetB0, Vision Transformer) with machine learning classifiers (SVM, Random Forest, kNN, XGBoost) in Python, scikit-learn and PyTorch/TensorFlow.
- Evaluated and compared pipelines using per-class precision, recall, F1-score and confusion matrices to find the most reliable model for telling apart visually similar diseases, and cached extracted features to cut computation.

Personal Portfolio Website (Link to the Portfolio)

- Prototyped a personal portfolio website in Figma, then built it as a responsive single-page site in HTML, CSS and JavaScript.
- Built scroll-driven interactions in JavaScript, including an animated SVG timeline for my education, a typewriter-style intro and on-scroll reveal effects.

Track Your Meal: Nutrition Tracking Desktop App

- Built a desktop meal-planning app in Scala 3 and ScalaFX (FXML) that lets users log daily meals, track calorie goals with a progress bar, and see per-food calorie breakdowns in a pie chart.
- Designed a MySQL database of users, products and meal plans linked by foreign keys, accessed through ScalikeJDBC data-access objects and storing 10+ nutritional fields per product.
- Added secure sign-up and login with BCrypt password hashing and session handling, plus input validation (such as duplicate-barcode and username checks) and a built-in daily calorie calculator.

ACHIEVEMENTS

Recipient of Jeffrey Cheah Entrance Scholarship — **April 2024 - Present**
Sunway University, Selangor

Dean's List Award — **April 2024 – May 2026**
Sunway University, Selangor

VOLUNTEER EXPERIENCE

Volunteer — **December 2025**
Sunway Robotics Club, Sunway University

- Contributed to the successful execution of a university robotics competition by assisting with event coordination, overseeing participant management, and helping maintain efficient event flow under time constraints.

CERTIFICATES

CCNA: Introduction to Networks — **May 2025**
Cisco Networking Academy
